ALL CREATION GIVES GOD PRAISE: PROTECTING BIODIVERSITY IN A TIME OF CLIMATE CRISIS

The species around us, upon whom human life depends, are declining in numbers and diversity at alarming rates. We can act to protect all life through our individual actions, our communities, and national and global advocacy and action. Grounded in Scripture, Catholic Social Teaching, and Pope Francis' encyclical *Laudato Si'*, this Earth Day program will help mobilize the Catholic community to take urgent action to protect all of God's Creation.
